5 An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Amend claim 28 as follows.

ε'10 --~~28~~⁶. (Twice amended) The variant of claim ~~16~~⁴ that is rendered resistant to enzymatic cleavage by an amino acid substitution at position 275 or [the] 277 [site] or both.--

15 In claim 31, line 24, please change "N103A296A297AA298A299 t-PA to --N103A296A297A298A299 t-PA--." This corrects a clear typographical error.

Amend claim 70 as follows.

20 --~~70~~²⁵. (Amended) A composition for treating a vascular disease or condition comprising a therapeutically effective amount of t-PA variant of claim ~~68~~²⁴ in admixture with a pharmaceutically acceptable carrier.--

[ε² Amend claim 71 as follows.]

25 --~~71~~²². (Amended) A composition for treating a vascular disease or condition comprising a therapeutically effective amount of t-PA variant of claim ~~69~~²¹ in admixture with a pharmaceutically acceptable carrier.--

30 Authorization for this Examiner's Amendment was given in a telephone interview with Dr. Ginger Dreger on 23 May 1994.

35 The following is an Examiner's Statement of Reasons for Allowance:

40 Claim 15 has been canceled. Claims 1, 11-12, 16-17, 24-28, 30-31, 58-60, 62-65, and 67-73 are under consideration by the Examiner.

45 Application 07/841,698 was filed on 2/26/92 and assigned to Genentech on the same date. Application 07/480,691 was filed on 2/15/90 and assigned to Genentech on 3/30/90. The instant application 08/035,427 is a continuation of application 07/824,740 which is a continuation of application 07/480,691. According to the provisions of MPEP 306 the instant application is thereby assigned to Genentech. Reel/frame 5277/0157 refers to the 50 07/480,691 application. This establishes that the conflicting

inventions were commonly owned at the time the invention in this '698 application was made and precludes a rejection under 35 U.S.C. § 103 based upon the commonly assigned case as a reference under 35 U.S.C. § 102(f) or (g).

5 The provisional rejection of claim 59 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-15 of co-pending application Serial No. 07/841,698 (now refiled as 08/168,060) has been withdrawn in
10 accordance with MPEP 804.

15 The provisional rejection of claims 72 and 73 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-17 of co-pending application Serial No. 07/841,698 (now refiled as 08/168,060) in view of Larsen et al. (WO 87/04722) has been withdrawn in accordance with MPEP 804.

20 It is noted that claims 1-25 of application 08/168,060 have been canceled and replaced with claims 26-38. Claims 59, 72, and 73 of the instant application are drawn to methods of treatment comprising administering particular t-PA mutants. The claims of the co-pending application are drawn to methods of treatment comprising bolus administration of particular t-PA mutants. The
25 particular t-PA mutants administered are co-extensive. The claims of the instant application encompass the invention of the co-pending application as the claims of the instant application can be literally infringed without literally infringing the claims of the co-pending application. Applicant's arguments concerning the
30 unexpected results for the co-pending application's claims are not persuasive. It is noted that the co-pending application does not compare the clearance time for bolus and continuous infusion of the mutants but only compares the clearance time for bolus and continuous infusion for wild-type t-PA. The recited mutations to
35 t-PA are known to provide improved half-life and no unexpected property has been demonstrated. In addition, the results set forth in the co-pending application are not commensurate with the claims. However, as these provisional double patenting rejections are the only rejections remaining at issue in the instant application they
40 are hereby withdrawn as set forth in MPEP 804. The instant claims may form the basis for an actual, rather than provisional, double patenting rejection in the co-pending application upon issuance of the patent.

45 Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
